Use Cases

HTA submissions

Run SLRs, meta-analyses, and KM-curve digitization to rapidly draft regional HTA submissions.

EU JCA dossier

Map evidence to your PICO, perform ITC / NMA, and draft your dossier.

Scientific publications

Rapidly perform SLRs and generate manuscript drafts for your team to refine.

PharmaEssentia Case Study

PharmaEssentia used ottoSR to rapidly conduct a meta-analysis that identified novel dosing responses in patient subgroups.

Under 14 days
to complete the meta-analysis

80–90%
reported time savings
