Use Cases

HTA submissions

Run SLRs, meta-analyses, and KM-curve digitization. Build cost-effectiveness models for your submission.

EU JCA dossier preparation

Map evidence to your PICO, perform ITC / NMA, and draft your dossier.

Manuscript preparation

Turn your literature review into a manuscript draft for your team to refine.

PharmaEssentia Case Study

With otto-SR, PharmaEssentia completed a meta-analysis and surfaced novel dosing subgroups.

Under 14 days
to complete the meta-analysis

80–90%
reported time savings
